

# Case study

The University of Michigan Health System, a 1,100-bed academic medical center, instituted a prior authorization gold card program to reduce costs, expedite care and improve ordering behavior with CareSelect® Imaging.

Goals	Solution	Results
Reduce the time and effort of the prior authorization process	Coordinated with payer to use CareSelect Imaging scores for advanced imaging studies to automatically approve high-utility orders	 <b>\$250,000<sup>1</sup></b> estimated savings from write-offs and one FTE due to the reduction of peer-to-peer reviews   <b>0 days</b> imaging exams were scheduled and performed immediately in place of waiting days for authorization, helping expedite patient care

“This has been a win-win for patients, the payer and for us. Patients have faster access to care, and time and money is saved by bypassing the traditional prior authorization process.”

– Dr. Kenneth Buckwalter, MD, MBA, FACR of University of Michigan Medicine<sup>2</sup>
